EDUCATION

Bachelor of Technology (B.Tech) in Computer Engineering

SCTR's PUNE INSTITUTE OF COMPUTER TECHNOLOGY

09/2025 – Present | Pune, India

Currently in Second Year.

CGPA - 9.85

CERTIFICATES

[McKinsey Forward Program](#)

Explored different courses :-

- Adaptability and Resilience Course
- Problem Solving Course
- Communicating for Impact Course
- Relationships and Well - Being Course

ACHIEVEMENTS

LeetCode: Solved 200+ data structures and algorithms problems; achieved a peak contest rating of 1426.

HackerRank: Achieved a 5-star rating in Problem Solving (C++).

SKILLS

Programming Languages

- C
- C++
- Python

Core Concepts

- Data Structures & Algorithms
- Data Analysis
- Object Oriented Programming

Backend & Data Engineering

- FastAPI
- REST APIs
- PostgreSQL
- Data Pipelines

AI & Machine Learning

- Machine Learning
- NLP
- RAG
- Embeddings & Vector Databases
- Sentence Transformers
- LLM Applications

Tools

- Git & GitHub
- VS Code
- Docker

PROJECTS

Universal Data Ingestion

05/2026 – Present

- Built a containerized end-to-end ETL pipeline using FastAPI, Docker, and Sentence Transformers to automate unstructured document processing.
- Correctly classified and dynamically mapped schemas for over 1,000 uploaded documents across 3 distinct file formats into PostgreSQL.

[Auto Schema Pipeline](#)

02/2026 – 04/2026

- Developed a zero-configuration pipeline that auto-infers database schemas from CSVs up to 200MB, eliminating manual SQL writing entirely.
- Integrated Gemini API to generate context-aware queries, delivering up to 10 automated analytical insights via a live dashboard.

[Log Data Pipeline](#)

01/2026 – 03/2026

- Engineered a modular Python ETL pipeline to ingest, clean, and transform over 10,000 rows of raw, unstructured server log data.
- Structured raw data streams to generate automated, actionable backend analytical insights.
